Scarce complete set. History of Haiti by Alexis Beaubrun Ardouin (1796–1865), a Haitian historian and politician who lived through the history he writes about. In these 11 thick books Ardouin offers a comprehensive and amazingly detailed history of Haiti, from the period of the French Revolution, with detailed accounts of slave revolts, the French Revolutionary Government's abolition of slavery, the white colonists' attempts to make a deal with Great Britain and the British and Spanish invasions of Haiti, the rise of Toussaint L'ouverture (1743–1803) , a former slave who became a remarkably effective military leader in the Haitian Revolution, in the events leading to Haiti's independence, the first nation formed from a slave-revolt and the first black-rule nation in the western hemisphere. These books describe Haitian independence, its Constitution, and the early years of independence, with the factional fighting, temporary unification with what is now the Dominican Republic, the emigration of thousands of free African Americans to Haiti, the temporary establishment of a monarchy, heavy reparations paid to France, and all of the crises and problems of the young republic in its first 40 years.
